**If you are in Saratov Region on a tourist visa:**

If you stay within the tourist visit in the hotel the receiving party is the hotel administration which notifies the territorial agency of the Federal Migration Service of the foreign citizen's arrival within one day, and performs all necessary actions relating to the registration of foreign citizens and bears responsibility for compliance with established rules of stay. The mark on the registration at the place of temporary residence is put down in your migration card.

**If you are in Saratov Region under the private invitation:**

In case of living with relatives or friends, or at the private address in the rented apartment you will need to stand up for the migration registration at the place of the temporary residence.

The owner of the apartment shall provide the Federal Migration Service of Saratov Region within 3 days the original and the photocopy of your passport, the migration card. With this form the owner of the apartment goes to the division of the migration service, or in the communication post office. The notification form has the detachable part. The postal worker or the employee of the migration service having accepted the notice puts the stamp on the reverse side of the detachable part. The detachable part is the document confirming your official stay in the area.

Having received the notice by registered mail or personally migration officials will bring the information about the foreign citizen into the central databank of the account of foreign citizens.

If you decide to visit another city of Russia (temporarily, with excursions up to 3 days) during your stay in Saratov Region the re-migration registration at the place of residence is not necessary.

The period for which you have the right to come to visit the Russian Federation:

It depends on the country from which you have arrived. In the visa-free access the period is three months.

The period is usually up to three months with a visa. There are a few exceptions. For example, the citizens of Lithuania can be in Russia under private visas about one year.

The maximum term of stay in Russia for the foreigners who have arrived under the visa is 90 days within six months. They must leave the country after that. If the person has found a job and has concluded the labor contract during three months he can already extend the term for an operating time.

The receiving party is obliged to hand over the detachable part in the territorial division of the Federal Migration Service of Russia in Saratov Region (personally or by mail) within 2 working days after the departure of the foreign citizen from the place of stay.

## **10. BEHAVIOUR RULES AT EMERGENCY SITUATIONS**

### **Fire in the room (apartment)**

If you had a fire you must immediately call the fire service by phones 01, 010, 112. If the electrical household appliance has lit up, try to disconnect it, if the TV is - first of all, pull out a plug from the socket or de-energize the apartment (room) through the electrical panel. If other electrical appliances or wiring are burning you have to turn off the knife switch, the switch or electrical plugs, and then call the fire department.

If you see that it is not possible to liquidate ignition by own strength you should leave immediately. Take the documents, money, and leave the room (apartment) through the front door. If the path to the front door was cut off by fire and a smoke you should escape through a balcony or through a window.

### **Fire in the lift**

Inform the dispatcher immediately, having pressed the button "call" at the first signs of ignition or at occurrence of an easy smoke in a cabin or lift mine.

### **Fire in a court yard**

Call in the fire service immediately in case of ignition. Try to localize the fire, and prevent the fire spread to the wooden houses and cars together with neighbors. If it is possible move cars on the safe distance and water them for cooling to avoid explosion of fuel tanks in the absence of owners of cars.

Use the garden hoses, buckets with water, sand and fire extinguishers for suppression. Take children away from the fire; do not forget about your safety. Free up the roads inside the yard for the passage of fire engines.

### **If the car is burning**

The fire in the car can be recognized practically at once. The smells of gasoline or burned rubber in a cabin, occurrence of a smoke from under a cowl are the factors prior to ignition and fire.

Use the fire extinguisher submitting foam or a powder in the direction from the edge to the center of the hearth at suppression of the fuel spilled under the car.

If it is impossible to eliminate the fire quickly get away from the car on a safe distance as the fuel tank can blow up. Do not sit down in the burning car at all, and do not try to start it. There should not be people in the area within the danger zone (not less than 10 meters).

Water standing nearby cars or roll them away aside to avoid the spread of the fire by means of passers-by and drivers when expecting the firemen. If there is a person in the cabin of the burning car, and the doors were jammed you should break the doors or beat out the glass (use a mount, a stone or legs).

Remove the victim from the car, call the ambulance and provide the victim with the first medical aid, or send him to the nearest clinic by the first car stopped by you, having remembered or having written down its number.

After the elimination of the fire tell about the incident by phone 01, 010, and 112.

### **Gas leak**

Having felt a gas smell indoors shut off its supply to the stove immediately and urgently call the emergency gas service by phone 04, 040, working round the clock. Thus do not smoke, do not light matches, do not turn the lights and electrical appliances (preferably de-energize the entire apartment, turning off the power to the distribution board). So the spark could not ignite the gas which has collected in the apartment and cause an explosion.

Air the whole apartment thoroughly and not only the gas-polluted room by opening all doors and windows. Leave the room and do not come into it before the disappearance of the gas smell.

### **The accident at the communal life-support systems**

It is necessary to inform about the accident by phone 05.

Disconnect immediately all electrical appliances, pull out the plugs from the sockets when racing or off-voltage in the electrical network. So there will be no fire at the sudden inclusion of electricity during your absence.

Do not approach closer than 5-8 meters to ragged or sagging wires, and do not touch them when you are outside. Arrange protection of the place of damage, warn others of the danger and notify immediately by phone at 068. If the broken wire has fallen close to you move out of range of electric shock in small steps or leaps (keeping your feet together) to avoid hitting the step voltage.

Close all cranes opened before when fading in tap water system. Use potable water available on sale for cooking. Refrain from the use of water from springs and other open reservoirs.

Use electric heaters for premise heating in case of disconnection of the central steam. Otherwise the probability of the fire or failure of system of the electrical supply is high. Remember that premise heating with gas or electric oven can lead to tragedy.

### **What to do when receiving trauma**

Refer to the trauma center or point of urgent medical aid.
